TITLE : MULTIPLE STACKING TRAY

ABSTRACT : PROBLEM TO BE SOLVED: To prevent a stored article from being damaged by a leg part when a tray is stacked with the article placed on a support panel.

SOLUTION: On the top face of a support panel 31, a panel shape leg part 33 is protrusively provided, and at the adjoining position of the leg part 33, a through leg storing part 34 is provided. The leg part 33 and the leg storage part 34 are positioned symmetrically with respect to the center point of the support panel 31. The support panel 31 storing an article 50 to be stored between the leg parts 33 can be stacked by placing a support panel 31 positioned above on its leg parts 33. Also when the support panel 31 is empty, the top and bottom two support panels 31 can be stacked by placing its leg part 33 in the leg storing part 34 of the support panel 31 positioned above.
